

**Trust
your
aircraft
to us.**

A well maintained plane is a safe plane. As a FAA Part 145 Repair Station, we are one of the most trusted aviation maintenance facilities in the US. Based at the Long Beach Airport for over 30 years, we carry out the regularly scheduled and unscheduled maintenance that limits the total downtime of your aircraft.

Our factory-trained techs combine state-of-the-art training, cutting-edge tooling, and a first-class facility to handle all the details of repairing and maintaining your aircraft, so you can spend more time flying and less time worrying.

Our team is led by professionals with decades of experience working on general aviation aircraft, from trainers to business jets. As a Textron Aviation Authorized Service Facility, OCR Aviation offers a wide range of aircraft maintenance on a wide variety of aircraft from most general aviation manufacturers.
